EXPERIENCE

Shopee Singapore

Senior Associate, Technical Project Manager **Jan 2026 – Present**

- Built and deployed a production multi-agent AI system that assesses project complexity across six risk dimensions, cutting manual planning overhead and improving consistency. Architected inter-agent orchestration ("Enrich Loop") with real-time knowledge retrieval, guardrails, and adaptive mode-switching, validated through phased QA.
- Eliminated fragmented reporting across 5 major product lines (25+ teams) by building scalable Python data pipelines integrating internal APIs with Google Sheets into a unified reporting architecture.
- Built custom Claude Code agent skills adopted in PM workflows: a release-calendar agent answering live natural-language scheduling questions, and a complexity bot grounding projects against the internal Knowledge Base across six risk aspects.
- Shipped frontend and backend features into Shopee's production React/TypeScript monorepo through an AI Workflow pipeline (Claude Code and Codex): authored feature briefs, generated requirements and implementation specs, then reviewed AI-generated code as human-in-the-loop across deploy and QA gates; mentor junior PMs and engineers.

Associate, Technical Project Manager **Apr 2022 – Dec 2025**

- Drove GMV +10% with the Expat initiative, a translation feature, by leading model training, production deployment, UAT, and A/B experiments from kickoff to launch.
- Grew Ads Revenue +8% across APAC/LATAM by leading multi-iteration A/B testing and a phased Homepage rollout under aggressive timelines.
- Directed end-to-end expansion into 2 new adjacent countries, coordinating 15+ cross-functional teams to provision containerized infrastructure, databases, middleware, monitoring, and budget guardrails, then launching a localized app across regional stores with sustained traffic uplift.
- Owned full SDLC (PRD design, test strategy, release planning, post-production support); established milestones, quality gates, rollback criteria, and defect taxonomy aligned across Product, Engineering, QA, and DevOps.

Xtremax Singapore

Application Consultant **Mar 2021 – Mar 2022**

- Led end-to-end development of responsive web applications (HTML5, CSS3, Vue.js, Laravel), gathering requirements from clients, managing the Agile SDLC, and presenting solutions to cross-functional stakeholders.

Hispeedcity Sdn Bhd, Malaysia

Mobile Development Intern **Aug 2020 – Feb 2021**

- Improved sprint predictability and earlier defect identification by analyzing user stories and applying Scrum practices across the team.

IT Wonders Sdn Bhd, Malaysia

Web Developer Intern **Feb 2019 – Jun 2019**

- Delivered responsive web applications using Vue.js / Vuex / Vuetify and Laravel in a production client environment.

EDUCATION

Bachelor of Computer Science (Software Engineering), With Honours, Universiti Sains Malaysia, Penang 2016 – 2021
